

# BEHAVIOR

*Your child's behaviors can be positive or negative, physical or verbal.*

***Behavior is a reaction to our surroundings, feelings, and social interactions.***

## Sign

Negative behavior is a sign something deeper is going on.

Behavior is not who the person is, rather a reaction displayed.

## Communication

Behavior is communicating a message to us.

A trusting relationship is key to addressing the behavior.

## Discover the Source

What is the root cause of your child's negative behavior?

What is on the surface may not have anything to do with what is actually going on.

Figuring out the source is not always easy to uncover.

It takes time, compassion, understanding and patience to discover.

## Change a Negative Behavior

Address the cause of the behavior.

Be proactive, develop a **Positive Behavior Intervention Plan (PBIP)** to help with navigating surroundings, feelings, social and emotional situations in a positive way.
